

AMOSA PRESIDENT'S REPORT 2019: MR SEAN MURPHY

2019 has been again a busy year for AMOSA and has seen more members becoming active in assisting the current volunteers. The AMO industry is continuously experiencing new interpretations of existing legislation and we thank the members when they inform AMOSA of these interpretations as they occur, so we may resolve the issues at the CAA. Without the members help, expertise and feedback, AMOSA would not exist.

The members attendance and participation on the regular AMOSA/CAA meetings have provided a improved communication and resolution of issues effecting the industry with the SACAA. The industry accommodating training requirements achieved within Part 140 are proof of this

A very brief overview of the major issues of year to date;

- Calibration of equipment certification
- Recurrent/refresher training instructor requirements
- Overhaul/repair/modification licences held by technical staff. The debate continues on what approvals should people hold and a workgroup has been formed to negotiate with SACAA

I would like to thank the president of CAASA, the office support staff, and members for their on-going support and assistance whenever it was asked

My on-going opinion is that the AMOSA Exec has the commitment to represent the industry and when results are achieved, the effort will be well worth it.

SEAN MURPHY
PRESIDENT AMOSA
