CAASA PRESS RELEASE PART 93 EXEMPTION

CAASA Part 93 task team has been working with the SACAA and our legal team headed by Grant Naude to get the critical problems with Part 93 exempted to give respite to industry while the issues get resolved with an industry task team that will make the necessary amendments to Part 93 via the CARCom process.

As many will recall CAASA applied for a complete exemption of part 93 which was rejected by the DCA on the grounds that there were parts of Part 93 that are beneficial and safety matters. At the recent CARCom meeting whom AOPA attempted again to have the entire part 93 retracted to which the DOT responded that this would not happen as CARCom in the first place had recommended the original Part 93 for promulgation.

CAASA wishes to thank the small Part 93 team with those companies some named and some wishing to remain nameless, that contributed financially to the drafting of our exemption request and preparing for the negotiations that have been successful on this matter.

The exemptions department headed by Ms Cathy Teague has and continues to be extremely helpful and caucused extensively with CAASA ensuring the best outcome for the industry and SACAA considering the unique challenges.

The urgent next phase of the Part 93 regulatory amendment is a "Go Fast" project to assist the industry rather than hinder it. It has also been agreed that high performance aircraft will find a place in Part 91 where CAASA believe they should have remained.

CAASA premise of working with the SACAA to find common ground still shows fruits and SACAA has demonstrated they are serious in their intention to work with those organisations that come with solutions and to bring an international level of customer service to the industry.

CAASA members whom wish to be involved in the drafting the amendments to Part 93 must please contact CAASA and provide contact details as this will be a new team.

The exemption letter accompanies this press release.
